Closing gaps in the digital ecosystem with Open Architecture

Richard Thompson, VP Marketing

AGENDA

The changing landscape of global trade

Driving innovation through data sharing and Open Architecture

Exploiting open data formats and connectivity environments

Compliance & learning from other use cases

The changing landscape of global trade

- World merchandise trade volume forecast growing despite headwinds
- Wider regional variations
- Inventories building and delivery times shortening
- High degrees of uncertainty in forecasts

SMITHS DETECTION **ELECTORA**

Driving innovation through data sharing and Open Architecture

- Pace of collaboration
- Generic API and entry of new developers driving exponential rise in choice
- Competitive landscape

Exploiting open data formats and connectivity environments

1

Advanced Detection

2

Connectivity & Integration

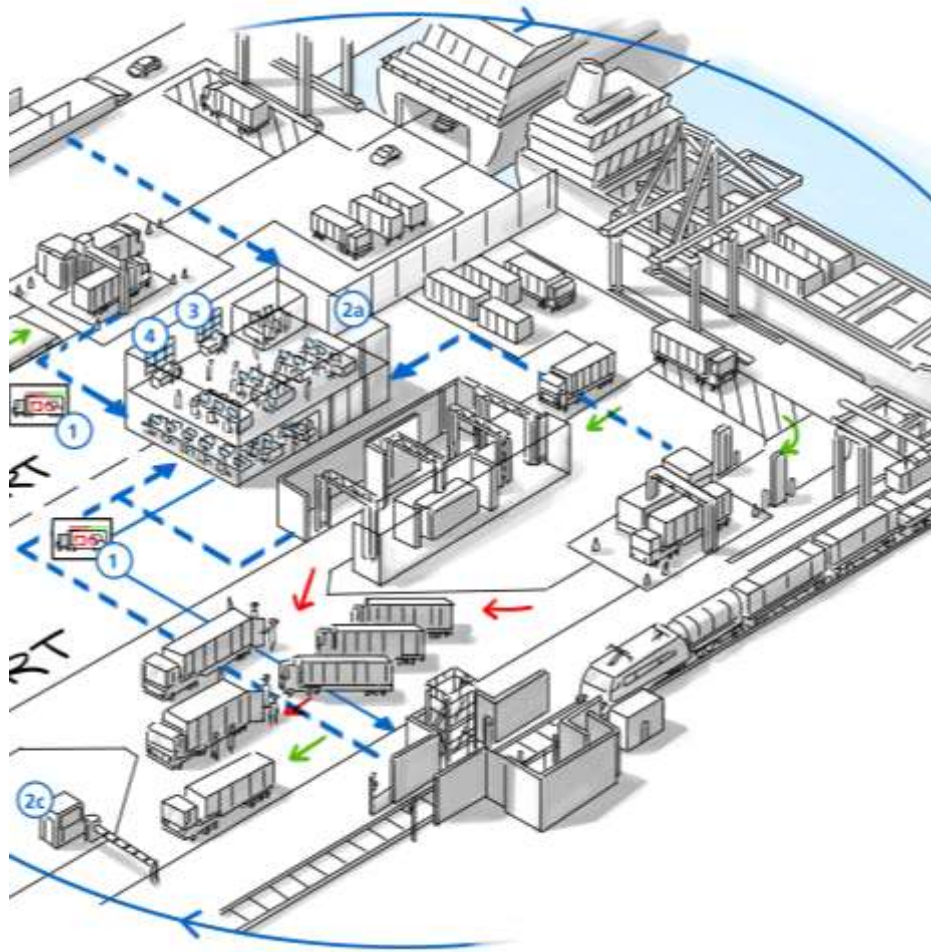

3

Operational Management

4

Data & Analytics

Exploiting open data formats and connectivity environments

Beyond image sharing towards a shopfront of approved applications from numerous developers

Compliance & learning from other use cases

Achieving Open Architecture while satisfying
compliance requirements
