

WCO Data Model for the **Private Sector**

Eng. Alejandro Rinaldi

Customs-hub

Version 4.0

Conformity Framework, as compliance tool

Level 1

Each element uses the correct name and format representation

Level 2

Level 1 + structure meets UML diagram

Level 3

Level 2 + recommended code lists

Level 4

Level 3 + based on supported format, i.e., XML, JSON

Version 4.0

JSON/OpenAPI

- Service-Oriented Architecture
- Module-Oriented Architecture

Customs processes are more and more complex, it is unlikely that a single IT solution will efficiently deal with all their aspects and complications

WCO Data Model ensures compatibility and interoperability in a SOA environment

Customs-hub

Thank you
