GROUP

Furniture

Kingsgrove Seat

The Kingsgrove seat is beautifully designed and constructed with hardwood slats.

The die cast frames are produced from 100% recycled materials and can be powder coated in a range of Dulux colours. Optional extras include arm rests.

Courtyard Seat

The Courtyard seat is simple in design yet beautifully constructed with hardwood slats.

The high-grade timber requires a periodic coating with an outdoor oil to maintain it's natural timber look. Optional extras include arm rests.

Monaco Timber Seat

The Monaco timber seat is elegant yet strong and durable suitable for parks and gardens, guaranteed to stay beautiful over the years overcoming weather ravages.

Monaco Aluminium Seat

The Monaco Aluminium Seat is elegant yet strong and durable suitable for parks and gardens, guaranteed to stay beautiful over the years overcoming weather ravages.

Parkway Seat

The smooth, clean lines of the Parkway seat are as pleasant to look at as it is functional.

The Parkway seat is built to be extremely tough and durable, yet simplistic in design to be used anywhere.

The Parkway is available in a variety of anodised aluminium colours including clear (aluminium), grey, blue and green, providing great flexibility to enhance your existing or new public environment.

Access Table Setting

The Access Table setting boast 3 thick, extruded aluminium planks. Match this table with your choice of bench or seat to create the perfect picnic setting.

Terrain Elements range of tables offer superior durability and are constructed from high quality materials. Many of our table settings may be custom ordered in length with various footing solutions available dependant on client requirements.

Monaco Timber Table Setting

The Monaco Table Setting is elegant yet strong and durable suitable for parks and gardens, guaranteed to stay beautiful over the years overcoming weather ravages.

Constructed utilising hardwood timber planks with powder coated extruded aluminium frame and legs and stainless steel anti vandal fixings.

Monaco Aluminium Table Setting

The Monaco Aluminium Table Setting is elegant yet strong and durable. Suitable for parks and gardens, guaranteed to stay beautiful over the years, built to withstand the wrath of mother nature.

Daintree Table Setting

Terrain Elements timber range of tables offer superior durability and are constructed from high quality materials. Many of our table settings may be custom ordered in length with various footing solutions available dependant on client requirements.

Shelters

Barossa Wave Shelter

The Barossa shelter is constructed using structural grade 20um anodised aluminium.

Terrain Elements selection of shade structures are as practical and durable as you can get with Colorbond roof sheeting, anodised anti-graffiti finishes and tamperproof, stainless steel fixings.

Capricorn Shelter

The Capricorn shelter is constructed using structural grade 20um anodised aluminium.

We stand by the quality and construction of our shade structures, with all of our structures certified with an Engineer Certification for Australian design and manufacture. Supplied with complete set of drawings.

Seaside Shelter

The Seaside Shelter's unique design offers a combination of modern and classic styling in the one impressive shelter. The curved roofline is perfect for spanning larger areas, for a modern look, offering strength and sturdiness in harsh environments. Yet for smaller, rectangular spaces, it offers a classic look that is perfect for the sidelines of sporting fields and pitches.

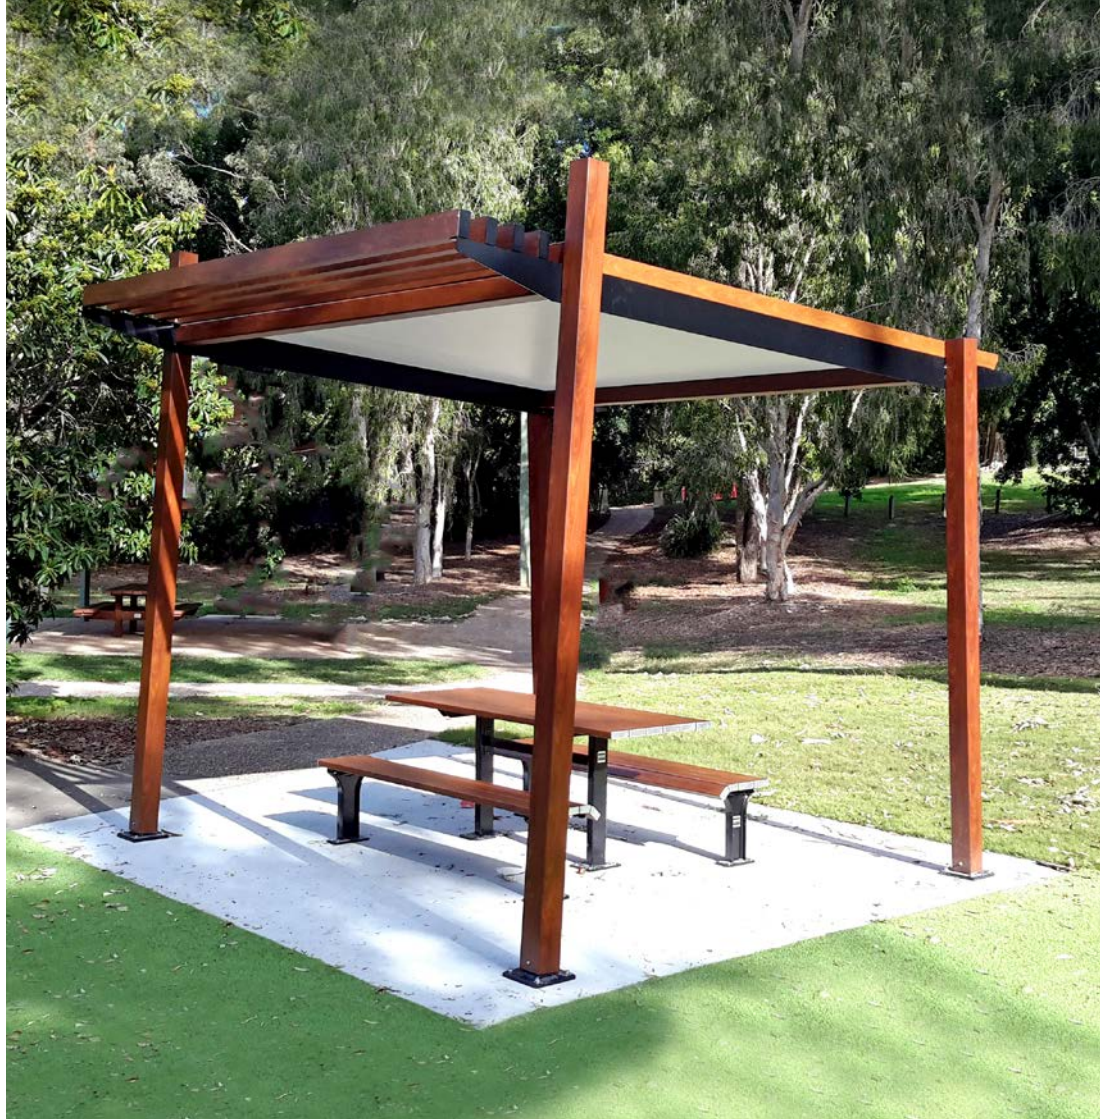

The Seaside Shelter is also available in a Bush Shelter configuration which includes rear and side screening options.

Akiva Shelter

Terrain Group's Akiva Shelter combines sleek, modern lines with a Versiclad Insulated roof to create a shelter that is eye catching and unique, yet incredibly comfortable and functional.

Available in a range of colours and finishes, the superior anodised aluminium construction ensures this structure will stay looking great for a long time, no matter how harsh the environment around it.

Citi Bin

The Citi Bin-Standard is simple but elegant with a perforated body.

Manufactured with mild steel powdercoat finish, it is perfect for outdoor and urban design projects.

Macquarie Bin

Designed by Brisbane City Council, this bin offers you the opportunity to include corporate logo / features in panels.

This style can be installed in banks together for large public events.

Bayside Bin

The Bayside waste bin offers you the solution for bin enclosures.

Our extensive range of bin enclosures are designed to secure waste whilst restrict airflow to a fire which may be ignited within the bin itself. The restriction of airflow has the potential to kill the fire providing significant benefits for public safety, and is highly advised for use within high fire risk areas.

Malibu Fountain

The Malibu drink fountain's unique design and many features will water your grounds and refresh visitors. The Malibu drink fountain offers smart, clean square lines and is designed to accommodate multiple tap options this includes a tilt dog bowl and side tap.

Our high quality manufacturing process and finishes ensure our fountains offer superior vandal and corrosive-resistant properties, ensuring our fountains will look good and remain functional for years to come.

Barron Fountain

The Barron drink fountain's unique design and many features will water your grounds and refresh visitors. The Barron drink fountain offers smart, clean domed lines and is designed to accommodate multiple tap options.

Our high quality manufacturing process and finishes ensure our fountains offer superior vandal and corrosive-resistant properties, ensuring our fountains will look good and remain functional for years to come.

Shower Post

The Terrain Shower post is manufactured from maintenance free durable 20um anodised aluminium and specifically designed for recreational areas, offering a choice of colour, finish and tap configurations.

Custom Furniture

At Terrain, we understand that an off the shelf solution may not suit every application. So we offer our custom furniture service to ensure your ideas can come to life no matter how outside the box they are.

From simple modifications to existing designs, to completely unique structures designed to perfectly compliment the surrounding environment the way the architect envisioned it; Terrain happily provides this service to support our clients who choose to push the boundaries of landscape architecture.

Parklets

Parklets are a relatively new concept in street space usage, generally recognized as first being used in San Francisco, built to encourage people to get out and use urban outdoor settings more easily. Custom parklets are built from steel and timber, designed to be removable by forklift and require minimal maintenance to keep them looking great. In addition to these qualities, they are also designed to be accessible by people of all abilities. Planter boxes, seating and tables for dining are also featured heavily in these parklets, bringing colour and vibrance to a main street or dining area.

Restrooms

Restroom Features

All restrooms use heavy steel frames in a Hot-Dip Galvanised finish and are clad with Colorbond steel sheeting. External steelwork is top coated in a powdercoat finish with an option of epoxy two-pack coating for additional corrosion resistance. To withstand highly corrosive coastal environments, the sheeting can be upgraded to Colorbond Ultra.

Structurally engineered for the extreme, Modus Australia buildings have been proven in the cyclonic regions of Australia.

Heavy Duty

Built for anywhere, built to last

Safe and Reliable

Safety first, always.
