# Smarter solutions means less maintenance

With tightening budgets and shrinking time frames, the pressure is on to provide the community with green spaces and sports fields that they can enjoy in the most efficient, cost-effective way possible.

To achieve this, Syngenta aims to help you do more with less.

- ACELEPRYN Insecticide and BARRICADE Herbicide provide effective season-long control with just one application, saving you labour and expense and are exempted from poison scheduling
- PRIMO MAXX Growth Regulator delivers greener, more resilient turf that requires less mowing
- TRIMMIT reduces hedge regrowth so you get better-looking, more uniform hedges with less maintenance

By supporting highly effective turf and landscape management, our range of products don't just improve parks and landscapes; we help you get the results you want as efficiently as possible, so you can make the most of the resources you have.

## Improving sports field durability

### Season long grub and weed control with one application

BARRICADE Herbicide controls a wide range of pre-emergent grassy weeds for up to six months, and ACELEPRYN has destructive insect pests covered with a single application. Both these products are exempt from poison scheduling, which results in reduced PPE requirements for workers and lessens disruption to the community. By using BARRICADE and ACELEPRYN together, you can achieve efficient and economical weed and insect management that lasts all season.

GROUP **28** INSECTICIDE

ACTIVE: chlorantraniliprole

PACK: 750 mL

#### Target Pests

Beetle larvae including African Black Beetle, Argentinian Scarab, Argentine Stem Weevil and Billbug

Rate/ha

0.75 to 1.5 L

Caterpillars including Black Cutworm, Lawn Armyworm and Sod Webworm

750 mL

GROUP **D** HERBICIDE

ACTIVE: prodiamine

PACK: 5 L

#### Target Weeds

Barnyard Grass, Crab Grass, Crowsfoot Grass, Parramatta Grass, Rat's Tail Fescue and Summer Grass

Rate/ha

1 to 3 L

African Lovegrass, Bahia Grass and Kentucky Blue Grass

2 to 3 L

Paspalum

2 to 4 L

Winter Grass

1 to 4 L

Refer to the registered label for full details, instructions for use and state limitations.

# Make good turf great

TURF

## Reducing costs and increasing turf quality

PRIMO MAXX encourages slower turf growth so you get greener, denser and more resilient green spaces with that 'freshly mowed' look for longer. PRIMO MAXX lowers mowing frequency which cuts down on maintenance, traffic management costs and WHS liability by reducing the need to mow in dangerous, hard-to-access areas. The turf on your sports fields and ovals will also have stronger root systems, making them better equipped to stand up to wear and tear.

Hybrid Couch	0.15 to 0.6 L
<b>Bahia Grass Management</b>	
Suppression and seedhead control	2 to 4 L <b>plus</b> 75 mL MONUMENT LIQUID

# Better gardens and hedges

GARDEN

## Pre-emergent weed control in garden beds

BARRICADE Herbicide has a great fit in landscape settings, as it can be used in garden beds to provide up to 6 months control. This means less post-emergent sprays, such as Glyphosate, are required to get rid of unsightly weeds in garden beds. The liquid formulation delivers ease of use and accurate dosing. BARRICADE is also exempt from poison scheduling, resulting in reduced PPE requirements for workers.

## HERBICIDES

GROUP **B | I** HERBICIDE

**ACTIVES:** prosulfuron, dicamba

**PACK:** 1 kg

The wide spectrum broadleaf weed specialist

Target Weeds	Rate/ha
Blackberry Nightshade, Catsear, Chickweed, Creeping Oxalis, Curled Dock, Khaki Weed, Milk Thistle	600 to 800 g
Bindii, Burr Medic, Cotula, Dandelion, Fleabane, Lambs Tongue/Plantain, Subterranean Clover, Wireweed	800 g to 1 kg
Pennywort, White Clover	1 to 1.2kg

GROUP **B** HERBICIDE

**ACTIVE:** trifloxysulfuron sodium

**PACKS:** 100 mL, 1 L

The industry standard post-emergent, selective herbicide for couch

Target Weeds	Rate/ha
Catsear, Chickweed, Clover, Cotula, Creeping Oxalis, Curled Dock, Milk Thistle	300 mL
<b>Suppression of Kikuyu</b>	300 mL
Burr Medic	115 mL
Mullumbimby Couch, Nutgrass	150 mL
Bindii, Ryegrass, Winter Grass	225 mL

GROUP **K** HERBICIDE

**ACTIVE:** S-metolachlor

**PACKS:** 5 L, 20 L

Flexible pre-emergent weed control in turf production and sports fields

Target Weeds	Rate/ha
African Love Grass, Annual Ryegrass, Barnyard Grass, Burr Medic, Carrot Weed, Crowsfoot Grass, Liverseed Grass, Pigeon Grass, Summer Grass, Winter Grass, <b>Suppression of Pigweed</b>	2 L

GROUP **6** INSECTICIDE

**ACTIVE:** abamectin

**PACKS:** 1 L, 5 L

Unique formulation for effective control of Mites and Nematodes

Target Pests	Rate/ha
Sting Nematode, Ring Nematode	2 L
Couchgrass Mite	1 L

GROUP **12A** INSECTICIDE

**ACTIVE:** diafenthiuron

**PACK:** 1 L

Longer residual action against Couchgrass Mite

Target Pests	Rate/ha
Couchgrass Mite	500 mL
