## Therapeutic indications

For Adults, Adolescents aged 1-18 years and Children.

- Gastric antisecretory treatment when the oral route is not possible, such as:
  - Gastroesophageal reflux disease (GERD) in patients with erosive reflux esophagitis and/or severe symptoms of reflux.
  - Healing of gastric ulcers associated with NSAID therapy.
  - Prevention of gastric and duodenal ulcers associated with NSAID therapy, in patients at risk.
- Prevention of rebleeding following therapeutic endoscopy for acute bleeding gastric or duodenal ulcers.

## Method of administration

### IV Injection

5 ml of the reconstituted solution (8 mg/ml) should be given as an intravenous injection over a period of at least 3 minutes.

### Infusion

The reconstituted solution should be given as an intravenous infusion over a period of 10 to 30 minutes.
