

Calmoseptine[®] Ointment

*A moisture barrier that
prevents & helps skin irritations*

**TEMPORARILY RELIEVES
DISCOMFORT & ITCHING**

A Non Prescription Product

The Calmoseptine ointment was
made to use on infants to relieve them
of the diaper rashes.

- ✓ Can be applied to the mild skin abrasions to relieve the discomfort.
- ✓ Safe for a newborn baby but not for premature babies.
- ✓ Not useful for the deeper wounds or that of the mucous membrane.

WHEN USING FOR BABIES:

- ✓ Use it only for a maximum of 4 times a day
- ✓ Apply only a thin layer of the ointment
It would be pink in color
- ✓ Only the contact layer would be effective, apply thin layer not thick

BENEFITS OF USING CALMOSEPTINE OINTMENT

- ✓ Calmoseptine ointment makes a healthy skin barrier against moisture.
- ✓ Suitable for the incontinence of urine and diarrhea, diaper rashes, small cuts and scrapes, minor burn injuries, skin irritation etc.
- ✓ Relieves the irritation and discomfort temporarily and protects the open wounds from secondary infections.
It can lock in the moisture in the folded skin for babies.
- ✓ Relieves the skin discomfort after insect bites, poison ivy, eczema, simple rashes etc.
- ✓ Skin cream that is a perfect moisture barrier. It is medicated formula that can protect the skin and also initiate the skinhealing process. Soothes the burning sensation and literally calms the skin.
