

ABHUG 2021

IAPWS Australasian Boiler & HRSG Users Group Virtual Conference

16 - 18 November 2021

11am - 1.45pm NZDT (Auckland)

9am - 11.45am AEDT (Sydney, Melbourne)

8am-10.45am AEST (Brisbane)

6am - 8.45am AWST (Perth)

The IAPWS Australasian Boiler and HRSG Users Group (ABHUG) will conduct its annual meeting virtually on Tuesday 16 to Thursday 18 November 2021; three hours each morning for three days.

Up until 2018 the Australasian HRSG Users Group (AHUG) has met annually to discuss all aspects concerning HRSGs. In 2019 the Steering Committee and attendees have noted that many of the failure/damage mechanisms occurring in HRSGs are similar to those that occur in conventional boilers, and that other equipment in combined cycle plants have the same issues as in fossil plants. So in 2019 AHUG changed to ABHUG (Australasian Boiler and HRSG Users Group). ABHUG will continue to concentrate on HRSG aspects but will add the technical areas common in fossil and HRSG plants such as tube failures, steam turbine, high energy piping, valves and regulatory issues.

IAPWS ABHUG 2021 will feature presentations on plant operation, maintenance, layup, and chemistry. It will also feature interactive discussions with presenters, equipment specialists and users. All attendees will be encouraged to raise specific technical problems with their Boilers, HRSGs, Steam Turbines and Valves, and then participate while other attendees join in to share their experiences and debate solutions.

Who should register?

Managers, engineers, operators, maintenance personnel, equipment suppliers, consultants, and plant service providers. In fact, anyone with an interest in the design, operation, layup, maintenance, or chemistry of boilers and HRSGs.
