PROGRAM INFORMATION

OVERVIEW

MEDS provides Advanced Practice Clinicians in primary care, endocrinology & internal medicine education on the most recent developments in the diagnosis and management of common metabolic, endocrine and cardiovascular implications.

The US health care system continues to be considerably burdened by two noteworthy trends: the epidemic of diabetes and the ongoing shortage of endocrinologists. We launched MEDS to empower NPs and PAs who are on the frontlines with the expertise they need to step into these high-demand areas of practice and provide vital care to the growing number of patients affected by metabolic and endocrine disease. This conference marks our 12th year, with more than 6,000 clinicians having completed the program to date. Topics include:

- Diabetes
- Diabetic Kidney Disease
- Insulin Management
- Dyslipidemia and CV Issues
- Parathyroid and Hypercalcemia
- Obesity
- Thyroid Disorders
- Adrenal Disease
