

Opinion Polling and Survey Research Services

*Serving Colorado Fire Districts, Local
Governments, School Districts, and
Special Districts Since 2007*

Over time, every fire district and department in Colorado will ask its voters to approve a ballot measure to fund personnel salaries, training, equipment, and operations. **Like fire, it's not a question of if it will happen; it's a matter of when.**

Magellan Strategies helps fire districts achieve voter approval of funding ballot measures with professional voter opinion polling and survey research services. Our 15-year track record of accurately measuring Colorado voter support and opposition for a wide array of public safety ballot measures is phenomenal.

Furthermore, our surveys will educate and inform the communities you serve with information about your fire district's financial challenges and operational needs. For more information about Magellan Strategies, please visit our booth and talk with our CEO David Flaherty. Some of our fire district clients:
