Investment philosophy

We believe that compounding wealth and generating attractive risk-adjusted returns over time requires a **diversified** portfolio of **high quality dividend-paying** businesses, which reside at or near the top of the value chain within their respective industries.

Competitive edge: Strategically allocate between dividend growers and high yielders based on relative values, while seeking to maintain the strong quality of the underlying companies. Being **style agnostic** across the value-growth spectrum allows for flexibility at all points in the market cycle.

This document includes forward-looking information that is based on forecasts of future events of October 31, 2022.

Mackenzie Financial Corporation will not necessarily update the information to reflect changes after that date. Forward-looking statements are not guarantees of future performance and risks and uncertainties often cause actual results to differ materially from forward-looking information or expectations. Some of these risks are changes to or volatility in the economy, politics, securities markets, interest rates, currency exchange rates, business competition, capital markets, technology, laws, or when catastrophic events occur. Do not place undue reliance on forward-looking information. In addition, any statement about companies is not an endorsement or recommendation to buy or sell any security.

On July 26, 2013, the Mackenzie Global Dividend Fund changed its mandate from investing in equity and fixed income securities of companies that operate primarily in infrastructure related businesses to investing primarily in equity securities of companies anywhere in the world that pay or are expected to pay dividends. The past performance before this date was achieved under the previous objectives.

Portfolio Manager fully implemented new strategy February 1, 2014.

Disclaimer

Morningstar Star Ratings reflect performance of Series F as of October 31, 2022 and are subject to change monthly. The ratings are an objective, quantitative measure of a fund's historical risk-adjusted performance relative to other funds in its category. Only funds with at least a three-year track record are considered. The overall star rating for a fund is a weighted combination calculated from a fund's 3, 5, and returns, as available, measured against the 91-day treasury bill and peer group returns. A fund can only be rated if there are a sufficient number of funds in its peer group to allow comparison for at least three years. If a fund scores in the top 10% of its fund category, it gets 5 stars; if it falls in the next 22.5%, it receives 4 stars; a place in the middle 35% earns a fund 3 stars; those in the next 22.5% receive 2 stars; and the lowest 10% receive 1 star. For more details on the calculation of Morningstar Star Ratings, see www.morningstar.ca.

Quartile rankings and peers beaten are calculated by Mackenzie Investments based on the fund series-level data Morningstar provides. The CIFSC categories, Star Ratings, and number of funds in each category, for the standard periods are: Mackenzie Global Dividend Fund Series F, Global Equity category: three years – 1624 funds; five years – 1285 funds; ten years – 618 funds.
