Employee Health & Safety

SafeQual® software is a huge leap forward in efficiently supporting the processes necessary to succeed in your commitment to provide the safest possible work environment.

Inspection Ready

Supports the workflows that ensure employee health records are always in a state of preparedness for action and inspection.

Staff Accountability

Keeps managers and individual employees on track to completing necessary tasks on time.

Employee Incident & Requests

Provides data management and workflows for timely and accurate follow-up of employee injury, exposure, workplace violence, verbal abuse, and issues with infrastructure. Workflows include HR filing for Workers Compensation, OSHA reported injuries, tracking time-off, and more. Includes forms and workflows for employee requests for close-in parking with notification to security, and ergonomic equipment for management approval. Automation includes generating OSHA 300 log.

Vaccination Management

Complete management of vaccinations, integrated consent forms and automated email to employees, and capabilities to simplify Influenza and COVID-19 compliance. Document vaccinations given during onboarding as well as previous vaccinations, titers, fit tests, physicals, and other records into the system.
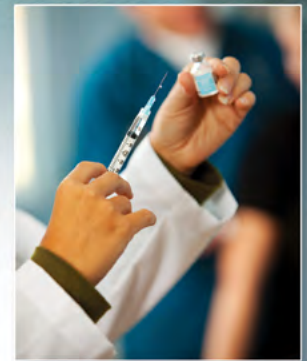

Employee Portal

Employees can upload vaccination record with workflow for EH to review & approve, decline vaccination, see his/her own vaccination history, consent to be vaccinated with workflow for EH nurse to document vaccination given, and request titer with workflow for EH nurse to document test result. Alternately EH can act on behalf of employee on all the above.

Track, Trend & Analyze

View, track, trend and analyze immunization compliance, respirator tests, health assessments, Workers Compensation, exposure to body fluids, hazardous materials, and drill down to details.

SafeQual continues to work towards a world where every hospital and clinic can be positioned to deliver services ethically, efficiently, and safely to all patients. We focus on arming the people managing that responsibility with technology that elevates collaboration, decision-making, and accountability.
