

One Herd Education Symposium

Veterinary Medicine, Animal Science
& Career and Technical Education

Goal

Texas A&M AgriLife Veterinary Science Certificate Program will offer three full days of sharing, learning, and networking for animal science educators. This professional development opportunity will provide teachers training to develop and plan curriculum, receive hands-on training to teach veterinary science skills in the classroom, and insight on preparing students to be exam-ready for certification. Many different aspects of animal science courses, curriculum and career opportunities will be included.

Keynote Speaker Tucker Brown

Tucker Brown is a 6th generation rancher at the R.A. Brown Ranch in Throckmorton, Texas. He and his family develop and sell about 800 breeding bulls yearly at their two annual sales. Tucker was named NCBA Beef Advocate of the Year in 2022 for his advocacy efforts over social media, where he shares the truth about American agriculture and has almost a half million followers. He and his wife Karley are now living their dream, working on the family ranch while raising good cows, two kids, and Quarter Horses.
